

## **PHASE TWO: CONTAMINATION RESPONSE**

**FREQUENCY:** PHASE TWO OUTLINES A SERVICE TO BE PERFORMED IN RESPONSE TO A SPECIFIC OUTBREAK

### **PHASE TWO REACTIVE RESPONSE CLEANING:**

To be performed in a “contaminated area” when an individual is suspected to have an illness of concern. Wet surface cleaning shall be performed by wiping down surfaces using a disposable wipe with an approved disinfecting solution hdqC by Spartan a quaternary disinfectant.

Following completion of the wet surface cleaning step the area shall be sprayed using electrostatic disinfection. Thoroughly spray affected areas using electrostatic sprayer until surfaces are uniformly covered in quaternary aluminum based disinfectant Clorox 360 by Clorox.

The PPE and cleaning supplies shall be disposed of in compliance with applicable regulations following completion of cleaning.
