

ITAMP Postdoc Fest - May 6, 2026

Phillips Auditorium, Center for Astrophysics - 60 Garden St.

Tal Scharzman, 1:30 - 2:10 PM

“Imaginary time evolution and ground state preparation using unitary multi-copy protocols”

Henning Schloemer, 2:10 - 2:50 PM

“Model-agnostic cooling algorithms for strongly interacting fermions”

Reuben Wang, 2:50 - 3:30 PM

“Getting zero-entropy ensembles with collisionally stable molecules”

Coffee Break, 3:30 - 4:00 PM

Oriana Diessel, 4:00 - 4:40 PM

“Dynamical regimes of a periodically driven metal and its photoinduced Meissner effect ”

Christian Kokail, 4:40 - 5:20 PM

“Learning Theory in AMO Systems: Methods and Applications”
